 Δ t50 is the UK's industry standard for heating outputs, which has an operating temperature of 75/65/20°C. If you have a low temperature heat source you may wish to consider Δ t40 or Δ t30 output (see your installer or system designer or download from www.stelrad.com).

Due to production tolerances the length of the product and therefore the tap centres could contain a variation of +/- 1.5% of the overall stated length.

For EN442 data, technical and installation information please visit our website: www.stelrad.com and search product downloads.

BRACKET INSTALLATION

All dimensions in mm. Inches in brackets.

MEASUREMENTS USING 10mm CVD BRACKETS SLOT

Add 5mm if using 15mm slot
