\(\Delta t\) is the UK’s industry standard for heating outputs, which has an operating temperature of 75/65/20°C. If you have a low temperature heat source you may wish to consider \(\Delta t\) or \(\Delta t\) output (see your installer or system designer or download from www.stelrad.com).

Due to production tolerances the length of the product and therefore the tap centres could contain a variation of +/- 1.5% of the overall stated length.

For EN442 data, technical and installation information please visit our website: www.stelrad.com and search product downloads.
