</tbody>
</table>

$\Delta t_{50}$ is the UK’s industry standard for heating outputs, which has an operating temperature of 75/65/20°C. If you have a low temperature heat source you may wish to consider $\Delta t_{40}$ or $\Delta t_{30}$ output (see your installer or system designer or download from www.stelrad.com).

Due to production tolerances the length of the product and therefore the tap centres could contain a variation of +/- 1.5% of the overall stated length.

For EN442 data, technical and installation information please visit our website: www.stelrad.com and search product downloads.
