Stainless Steel radiator

WALL MOUNTING INFORMATION

All dimensions in mm.

TOOLS REQUIRED FOR INSTALLATION

![Tools Required](image)

INSTALLATION INSTRUCTIONS

Place your radiator at least 12.5 cm above the floor.

Provide insulation by wrapping PTFE tape on the treads before installing the valves.

Apply silicone seal fluid to all trenched parts containing o-rings.

Connect your radiator to the utilities after following all the installation steps in the manual.

After connecting to the utilities, do not forget to discharge the trapped air inside the radiator.

INSTALLATION INSTRUCTIONS FOR THE STAINLESS STEEL TOWEL RAIL

1.

1- Adjust the height of your radiator by using a metric ruler.
2- Set the location of your radiator as desired, align with the ground by using a spirit level and mark the position of the wall mounting brackets.

2.

1- Drill holes (Ø 10 mm) into the spots you have marked.
2- Nail the wall plugs (E) in the holes by using a hammer.
3- Screw the wall mounting brackets all the way to the holes with the help of a screwdriver.

3.

1- Place your radiator into the wall mounting brackets (D).
2- Insert the setscrews (F) into the slots on the mounting brackets (D), adjust the distance between the wall and your radiator then tighten the setscrews by using an Allen key (M3).
