Δ t50 is the UK's industry standard for heating outputs, which has an operating temperature of 75/65/20°C. If you have a low temperature heat source you may wish to consider Δ t40 or Δ t30 output (see your installer or system designer or download from www.stelrad.com).

For EN442 data, technical and installation information please visit our website: www.stelrad.com and search product downloads.

FEATURES

Robust 2mm steel thickness

Outstanding heat performance

High quality pressed front

*Popular with consultants,
architects and interior designers*
